

FACTSHEET

Waste Wise Cities Tool in DAKAR, Sénégal

In the rapidly urbanizing world, the crisis in waste management and plastic pollution is a reflection of current unsustainable lifestyles.

The availability of fact-based data on municipal solid waste can guide evidence-based planning and

lead to increasingly effective and efficient solid waste collection systems, enhanced local resource recovery and controlled waste disposal, thereby improving the quality of life for urban residents.

UN-Habitat's Waste Wise Cities Tool (WaCT) assesses the parameters for Sustainable Development Goal indicator 11.6.1 - the proportion of municipal solid waste collected and managed in controlled facilities out of total municipal solid waste generated, by the city. It consists of seven steps and provides the necessary data to support evidence-based decision making by city managers.

Step 6: Waste Composition at Disposal Facilities

Step 7: Calculating Food Waste, Recycling, Plastic Leakage, Greenhouse Gas Emissions and Air Pollution

Together we can achieve a sustainable future.

Have a look at the Waste Wise Cities website, learn about the WaCT and how its application created impact on the ground in other cities.

City: **DAKAR**Country: **Sénégal**

Population: **1,476,669 (2020)**

Year of WaCT Survey: **2022**

Key Waste Data

Total
municipal solid
waste (MSW)
generated by
the city

Total MSW collected

1358 t/d

Total
MSW collected
and managed
in controlled
facilities

19 t/d

Per capita
MSW generation

0.97 kg/cap/d

Per capita household food waste generation

0.21 kg/cap/d

Household and non-household waste generation

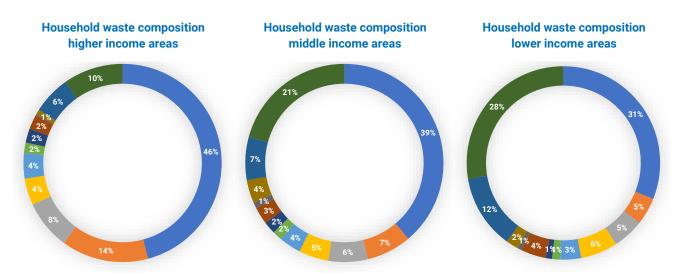

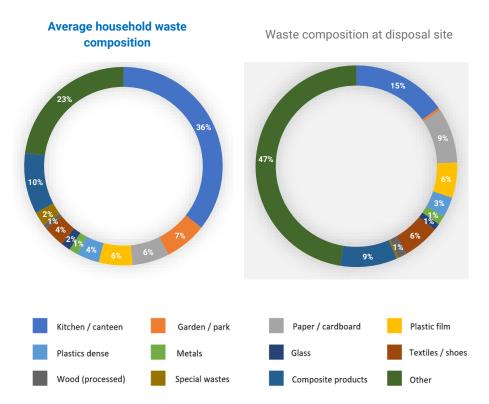

Av	erage household waste generation (kg/capita/day)	Total population	Total MSW generated by households (t/day)
High income	0.92	252,806	232
Middle incom	e 0.55	390,579	214
Low income	0.49	833,284	409
TOTAL	0.58	1,476,669	856

Total MSW generated from non-household sources (t/day) **570** calculated using proxy of 40 % of total MSW

Composition of waste at the households and at the disposal site

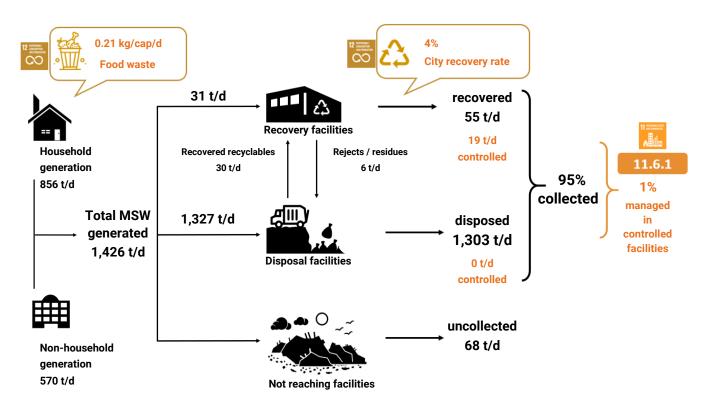

Potential recyclables from households

Types	Recyclable waste generation from households (t/day)
Food waste	305
Plastic film	47
Plastic dense	31
Paper and cardboard	51
Glass	13
Metal	13
Total	460
